

DI PIETRA

A journey to the most remote and fascinating places, a story written through the colours and veins of stones which evoke thrilling scenarios. Cir Manifatture Ceramiche created the new Di Pietra project by selecting characteristic minerals pertaining to the architecture and landscapes of distant lands, diverse in terms of climate and traditions.

Di Pietra is a project made entirely in porcelain stoneware, featuring specific finishes for indoor and outdoor spaces, which offers a wide range of sizes that are also suitable for use in modular and multi-size installation layouts. The objective behind such an extensive range is to maximize the evocative shades and seductive textures of the different varieties selected.

From the neutral colours Runi Avorio and Runi Tortora, which are particularly versatile in contemporary design, to the intense materiality of Ardenne Grigio and Ardenne Nero, which reveal their Northern European origin in the compactness of the colours. And then the more tropical offerings, which feature shade variations, Bali Red, inspired by volcanic stones featuring eclectic colours.

Di Pietra is a "collection" in the proper sense of the term, a collection united by the style and taste of Cir Manifatture Ceramiche in the selection of materials suitable for interpreting the most current trends in architecture and design.
