

## PORTA NUOVA

The colours and style of a place that was able to regenerate itself. Cir drew its inspiration for the Porta Nuova project from an urban invention that has changed the skyline of a cosmopolitan city, expressing, through the apparent minimalism of the brick size, the dynamic power of colour and the creativity of ceramics made in Italy. Porta Nuova is fine glazed porcelain stoneware available only in the 6.5x29 cm size, a small rectangle reminiscent of masterpieces of 20<sup>th</sup> century architecture and brings with it elements of originality for today's design.

The Porta Nuova colour palette begins with the extreme versatility of Bianco, moving on to an eclectic gamut through the warm notes of Cotto, the retro suggestions of Oliva green, the elegant neutral notes of Perla, the intensity of Petrolio blue and the sunny warmth of Senape yellow. Six colour families that highlight exquisite variations in tone, virtually a character highlight capable of bestowing depth to the clothed surfaces, both on walls and floors.

The lux and mat finishes, available for all Porta Nuova colours, expand the scope of layout options and allow you to play with light, one of the fundamental elements of contemporary design, which enhances the sensorial component of this elegant porcelain stoneware project by simply touching the surfaces. A play of contrasts, deliberately emphasized as a decorative proposal through the geometric patterns of Bicocca Mix, where light itself reveals forms and lines with a modernist vibe, very current in contemporary spaces.

### Technology

Glazed fine porcelain stoneware

### Colours

Bianco, Cotto, Oliva, Perla, Petrolio, Senape

### Decorative surfaces

Bicocca Mix

### Sizes

cm 6.5x29

### Surfaces

Lux - Mat

### Use

Residential and light commercial construction

### Production

Made in Italy
